Kenji Watanabe

AI Research Engineer

kenji.watanabe@example.net · Tokyo (open to Remote)

Profile

Research engineer with 4 years of industry experience training and evaluating large language models. PhD on retrieval-augmented language models; currently works on RLHF and long-context evaluation.

Education

Ph.D., Computer Science
Kanto Institute of Science, 2022

M.Eng., Information Engineering
Kanto Institute of Science, 2018

Experience

AI Research Engineer 2022 - Present
Sorahana Labs, Tokyo - *AI research lab (artificial intelligence)*

- Trains and evaluates 1B-13B parameter language models on a 512-GPU cluster.
- Built the long-context retrieval evaluation suite used to gate every model release.
- Wrote custom CUDA kernels that sped up attention by 1.4x.

Research Intern 2021 - 2021
Sorahana Labs, Tokyo - *AI research lab (artificial intelligence)*

- Prototyped a retrieval-augmented question-answering model (summer internship).

Skills

python pytorch jax transformers llm pretraining rlhf cuda distributed training rag llm evaluation
