Arjun Malhotra

Senior AI Engineer

PROFILE

AI engineer with 7 years of experience: five years building Python backends, then two years shipping LLM applications - retrieval-augmented generation over legal documents, agent workflows and evaluation pipelines.

EXPERIENCE

Senior AI Engineer 2024 - Present

Prismatica AI, Gurugram - *Contract intelligence software (legal tech)*

- Builds RAG and agent workflows that answer questions over 1.2M legal contracts with clause-level citations.
- Designed the LLM evaluation pipeline (faithfulness, citation accuracy) that gates every prompt change.
- Moved retrieval to hybrid search with a vector database; answer accuracy up from 71% to 88%.

Backend Engineer 2019 - 2024

Kitebird Software, Gurugram - *Project management SaaS (saas)*

- Built Python and FastAPI services on AWS for a project management product.
- Shipped the product's first LLM feature: meeting-notes summarisation.
